

PRACTICAL ASSESSMENT PHOTOGRAPH GUIDELINES

Please see below acceptable examples for photographs performing the work.

TRAFFIC CONTROLLER:

With your submission, we require one photo of:

1. Wearing correct PPE
2. Using the stop/slow bat in the correct hand
3. Using a two-way radio
4. Using hand signals

The Traffic Controller is in full PPE gear, you can see clear communication with the two-way-radio or through hand signals. The slow/stop bat is in the correct hand, hand signals are used properly. In the background you can see the ute/prior warning signs, as protection for the worker.

It is very important that a bit of the background is visible in order to identify the position of the Traffic Controller and the correct set up according to the TCP.

IMPLEMENT TRAFFIC CONTROL PLAN:

With your submission, we require one photo of:

1. Yourself setting up the worksite placing signs and cones
2. Wearing correct PPE
3. Using the stop/slow bat in the correct hand (if completing Traffic Control course)
4. Any other photos to demonstrate your practical assessment requirements

The photographs above show the participant in full PPE gear, setting up the signs and taking out the cones according to RMS regulations.
